## Little Goose Navigation Lock

### Update #2

Walla Walla District, Corps of Engineers and Knight Construction continue working collaboratively toward the 6:00 p.m., Friday return-to-service objective for Little Goose navigation lock, located at Snake River mile 70.3. Logistical challenges, inclement weather and engineering requirements make this a very dynamic endeavor. A better understanding of the return-to-service time will be known Wednesday evening.

Little Goose lockages using the floating bulkhead are tentatively planned to begin Friday, March 30 at 6:00 p.m.

All recreational craft lockages continue to be cancelled until the lock returns to full service.

There will be at least two other lock closures in April during the repair process, with times and dates to be determined. Little Goose lock is expected to return to full service on or about May 1, 2007.

Updates will be provided as repair work progresses.

Your cooperation in this matter is much appreciated. For additional information, please call Operations Division, at (509) 527-7115 or (509) 527-7114.

Public Notices and other navigation lock information are available on the Internet at:
